

CASE STUDY

Multi-utility contract – effluent treatment plant, boiler-house and waste management

▶ CLIENT OVERVIEW

The Corus Group is a leading Anglo-Dutch primary metal manufacturer and global supplier of steel and aluminium products.

With facilities in the UK, Netherlands, Norway and Belgium, its Corus Packaging Plus site in Trostre, South Wales is a foremost supplier of high quality light gauge steels to the packaging industries across the world.

▶ CLIENT'S REQUIREMENTS

Corus Packaging Plus was looking to achieve long-term savings and efficiency improvements in respect of its effluent treatment plant, boiler-house and waste management activities on site.

Corus wished to develop a multi-utility outsourcing strategy with an experienced utility provider who could offer operations and management within a single point of contact, allowing them to concentrate on their core activity.

▶ OUR SOLUTION

Veolia Environnement (VE), through Veolia Water Industrial Outsourcing (VWIO), offered a ten year multi-utility outsourcing contract, calling upon the expertise and resources of three VE divisions – Veolia Water, Dalkia and Veolia Environmental Services.

The tailor-made integrated solution includes:

- Management and optimisation of the existing effluent treatment plant
- Build, operate and maintain a new boiler-house facility
- Finance, design and commissioning by Veolia Environnement on behalf of the Client
- Site waste management services.

Within the partnership, VE and Corus Packaging Plus are committed to delivering environmental benefits to the Trostre site which will be achieved through targeted investments in the existing effluent treatment plant and the build of a state of the art gas fired boiler facility. A further important feature of the partnership will be the significant cost savings to the Corus Group delivered through operating and technical efficiencies. One of VE's key strengths is its ability to provide Corus Packaging Plus with a comprehensive suite of environmental services through a single point of contact.
